

Create Your Own Sidewalk Paint

No Chalk? No worries. Enjoy your time outside with sidewalk paint you can make right at home. This recipe can be made with flour or cornstarch following the instructions below.

For this project, you will need:

- Water
- Flour or cornstarch
- Food coloring (liquid or gel)
- Measuring cups
- Whisk or fork
- Small cups or cupcake tin
- Mixing bowl
- Paint brushes or sponges (optional)

Follow this recipe to make your sidewalk paint:

Step 1: Add one cup of cornstarch OR one-half cup of flour to your mixing bowl. Add one cup of water, and mix until combined.

Step 2: Split your mix into small cups or cupcake tin. Add one drop of food coloring per cup- adding too much food coloring may create stains.

Step 3: Your sidewalk paint is ready to use- use your fingers, brushes, or sponges to create your art outside.
